Industrial applicability (IA)	Claims	<u>1-21</u>	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

D1: US 6078908 A

D2: WO 0192999 A2

The aim of the claimed invention is to provide a method and a system for enabling a server to authenticate a user of a wireless terminal in a less complex way than in the known technology. This is achieved by eliminating the third party for verifying the authentication data and instead introducing a double sending of user identification parameters via different communication paths. This feature differs from the previously known solutions as represented by D1 and D2.

Therefore, the criteria of novelty and inventive step are fulfilled in the application.

Also the criterion of industrial applicability is fulfilled.
